Please read this document carefully before using this product. The guarantee will be invalidated if the device is damaged by not following instructions detailed in the manual. The company shall not be responsible for any damage or losses however caused, which may be experienced as a result of the installation or use of this product.

# **ENDA EU4430 PID UNIVERSAL CONTROLLER**

Thank you for choosing ENDA EU4430 Universal Controller Devices.

- ▶ 48x48mm sized.
- Dual setpoint value can be selected.
- PT100 , J, K, L, T, S, R sensor (thermocouple) types can be selected.
- ▶ 0-20mA, 4-20mA, 0-10V, 2-10V, 0-25mV and 0-50mV input selections.
- Auto calculation for PID parameters (SELF TUNE).

Self tune for automatic PID calculation or manually enter PID parameters if known.

- ▶ Three different feature can be assigned to digital input.
- Three different feature can be assigned to F function key.
- Soft-Start feature.
- Analogue, SSR or Relay Output Control selection.
- ▶ 0-20mA and 4-20mA Analogue Output Control selection.
- ▶ A1 Relay output programmable as primary Alarm or PID Cooling Control output.
- C/A2 Relay output can be used as secondary Alarm or Temperature Control output.
- Heating/Cooling control selection.
- Zero point input shift.
- In case of sensor failure, periodically, auto-periodically running or relay state can be
- selected.
- RS485 Modbus RTU communication protocol feature (Specify at order).

R⊚HS Compliant

Proportional band Can be adjusted between %0.0 and %100.0. If Pb=%0.0, ON-OFF control is selected.  Control period Can be adjusted between 1 and 125secs.  Hysteresis Can be adjusted between 1 and 50°C/F.  Output power Setpoint value ratio can be adjusted between %0 and %100.  HOUSING  Housing type Suitable for flush-panel mounting according to DIN 43 700.  Dimensions W48xH48xD87mm						
C/A2 Output Relay: 250V AC, 10A (for resistive load), NO+NC (Control or Alarm2 Output selection).  A1 Output Relay: 250V AC, 5A (for resistive load), NO (Alarm1 and Cooling Control Output selection).  ANL/SSR Output Max. SSR Output; 0-20mA, 4-20mA, 24V 20mA. Max. load resistance; 600 Ohm (12 bit 0.2% accuracy).  Life expectancy for relay Without load 30.000.000 switching; 250V AC, 8A (resistive load) 300.000 switching.  CONTROL  Control type Single Setpoint and Alarm Control.  Control algorithm On-Off / P, PI, PD, PID (selection).  A/D converter 14 bit.  Sampling time Min. 100ms.  Proportional band Can be adjusted between %0.0 and %100.0. If Pb=%0.0, ON-OFF control is selected.  Control period Can be adjusted between 1 and 125secs.  Hysteresis Can be adjusted between 1 and 50°C/F.  Output power Setpoint value ratio can be adjusted between %0 and %100. Enclosure material Self extinguishing plastics						
Avoid any liquid contact when the device is switched on.  DO NOT clean the device with solvent (thinner, gasoline, acid etc.) and / or abrasive cleaning agents.						

ENDA EU4430 PID Temperature Controllers are intended for installation in control panels. Make sure that the device is used only for intended purpose. The shielding must be grounded on the instrument side. During an installation, all of the cables that are connected to the device must be free of energy. The device must be protected against inadmissible humidity, vibrations, severe soiling. Make sure that the operation temperature is not exceeded. All input and output lines that are not connected to the supply network must be laid out as shielded and twisted cables. These cables should not be close to the power cables or components. The installation and electrical connections must be carried on by a qualified staff and must be according to the relevant locally applicable regulations

Logic output of the instrument is not electrically insulated from the internal circuits. Therefore, when using a grounding thermocouple, do not connect the logic output terminals to the ground. Note:

1) Mains supply cords shall meet the requirements of IEC 60227 or IEC 60245.
2) In accordance with the safety regulations, the

power supply switch shall bring the identification of the relevant instrument and it should be easily accessible by the operator.

- (1) Indicates measured value and set values in "Running Mode". Indicates the parameters and names in "Programming Mode".
- (2) Increment key in "Running Mode" and "Programming Mode". Parameter selection key in "Programming Mode".
- By pressing this key in "Running Mode", software version can be displayed. Parameter selection key in "Programming Mode".
- (4) Selectable function key "Running Mode". Menu selection key in "Programming Mode".
- (5) Control and Alarm set key in "Runnig Mode". Parameter set key in "Programming Mode"

(1) PV and SV Indicators	PV 7 Segment 4 digits green LED , SV 7 Segment 4 digits green LED display.		
Character Height	PV Display 12.0mm , SV Display 8.13mm		
( 2 ),( 3 ),( 4 ),( 5 ) Keypads	Micro switch		
( 6 ) Status Indicators	Control, Alarm1, Alarm2, Analog output, SSR output and status indicator symbols.
