ENDA PROBE TYPES

NTC probes are used for temperature measurement with thermostats.

NTC - APT - 1,5T (Thermoplastic socket 1,5m thermoplastic cable NTC prob
NTC - APP - XXP (PVC socket xxm PVC cable NTC pob)
NTC - APS - XXS (Stainless steel socket xxm silicon cable NTC prob)
NTC - LPS - XXS (Stainless steel socket xxm silicon cable NTC prob)
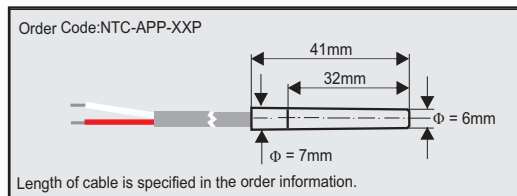

Technical Properties

Type of Sensor	Sensor Code	Range	Accuracy
NTC	NTC - APT - 1,5T	-50... +105°C	±0,5°C
NTC	NTC - APP - XXP	-30... +80°C	±0,5°C
NTC	NTC - APS - XXS	-60... +150°C	±0,5°C
NTC	NTC - LPS - XXS	-60...+150°C	±0,5°C

Technical Drawings

Thermoplastic Air Probe

Order Code:NTC-APT-1,5T

15mm
Φ = 5mm
Φ = 6mm

Length of cable is 1,5m.

Plastic Air Probe

Order Code:NTC-APP-XXP

41mm
32mm
Φ = 6mm
Φ = 7mm

Length of cable is specified in the order information.

Stainless Steel Air Probe

Order Code:NTC-APS-XXS

40mm
27mm
Φ = 6mm

Length of cable is specified in the order information.
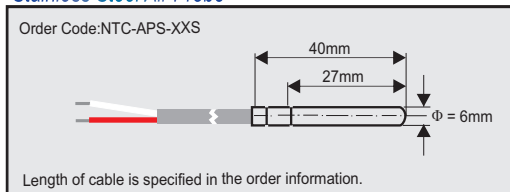

Stainless Steel Liquid Probe

Order Code:NTC-LPS-XXS

48mm
30mm
5
Φ = 6mm
Φ = 6mm   R 1/8"

Length of cable is specified in the order information.
